SUMMARY

Full-stack developer experienced in building AI-powered applications with tool calling and real-time API integrations. Shipped production platforms using Next.js and TypeScript, including LLM-based agents that execute database queries and automate workflows for data visualization and analysis. Comfortable working across the stack, from REST APIs to cloud-hosted databases. C2 English proficiency.

EXPERIENCE

Accenture | Business Architecture Associate | April 2025 – Present

- Diagnose and resolve technical issues across enterprise internal tools for clients.
- Supported onboarding of new users into enterprise systems, ensuring smooth adoption and minimal downtime.
- Leveraged SQL and internal tooling to investigate and fix data integrity and access issues across platforms.

Rigelec SRL | IT Specialist & developer | Dec 2024 - April 2025

- Built a Next.js BI platform integrating ERP and Detrack APIs, including an AI-powered chatbot with tool calling to execute database queries for real-time analytics.
- Designed and developed a complete [website](#) for the solar panel division and Growatt statistics integration.
- Participated in the implementation and migration to a new ERP system.
- Deployed and maintained production web applications with cloud-hosted databases, environment configuration, and external API integrations.

Carbeda Consulting (for Staatsolie) | Programmer | Data Science | Nov 2023 – Nov 2024

- Developed automated tools to extract data from SAP S4/HANA and generate real-time reports, reducing manual processing time.
- Designed Tableau dashboards to provide stakeholders with clear, data-driven insights.
- Delivered technical presentations and updates in English to global cross-functional teams.

Finnegans | Software Developer Intern | Jan 2024 – March 2024

- Developed ERP functionalities and back-office modules focused on user, sales, and reporting management.
